TIPS FOR PARENTS, FAMILIES & TECH DURING COVID-19

SOCIALIZE WITH FRIENDS!
Take care of your family's mental health including your children's need to socialize. This might mean an increase in online activities such as Facetime or Skype, online gaming with friends, text messaging, or talking on the phone. Think about your children's friends who might not have access to the internet.

LEARN IN DIFFERENT WAYS!
Don't try to replicate school with educational apps or formal educational activities. This is an unusual time, your child might need you as a parent rather than as a teacher. Lots of learning happens through daily activities such as play, making things, informal conversations, and reading together.

TECH TOGETHER!
Tech together when possible. This could be playing videogames with siblings, taking photos or creating videos together, playing or talking online with friends and relatives, or sitting down and watching a movie together.

TRY A SCHEDULE!
Consider setting a schedule that helps meet your family's changing needs. Having a schedule that includes tech time as well as time away from technology for activities such as playing board games, doing creative projects, reading, chatting, and finding ways to be physically active may help families balance their new 'home together' days.

EVERY FAMILY & EVERY CHILD IS DIFFERENT!
Keep in mind that every family and every child is different. Try not to compare your family's use to other families' media use. Focus on making decisions that are appropriate for your family.

RESIST THE GUILT TRIP!
There are many reasons parents and caregivers might feel guilty about parenting—additional tech time during a pandemic should not be one of them!

HELPFUL RESOURCES
Check your local public library website for access to free online materials such as e-books, audio books, music/movie streaming, and news sources. Also look for online programs such as virtual story times. Don't have a library card? Many libraries offer online registration. In addition, check out Common Sense Media (www.commonsensemedia.org). Professionals, parents and other caregivers have found it to be a useful go-to source. It's a comprehensive and credible site that includes reviews of movies, TV shows, books, apps and games as well as information about children and tech trends. There's a COVID-19 section with advice for parents and caregivers and suggestions for free, high-quality online learning resources.

This project was made possible in part by the Institute of Museum and Library Services, grant R-05-17-0012-17: Navigating Screens: Libraries as Community Hubs for Teaching Positive Screen Media Practices, www.slm.screen.wordpress.com.

A project of the University of Wisconsin, Drexel University, and the University of Oklahoma, the research involved interviews with 51 parents and 24 professionals from three U.S. states. To develop this infographic, the research team considered its findings in the context of family media use during the COVID-19 pandemic.
